

In step with the future of construction

DuPont™ Styrofoam™ Brand Insulation is ready to go Beyond Blue with our reduced GWP formulations. It's the next move in a journey that's driven by our commitment to build a more sustainable future, all while maintaining the trusted performance you've come to expect.

As of January 1, 2021 the Styrofoam™ Brand family of products includes:

- Our standard formulation Styrofoam™ Brand XPS (blue)
- Our Styrofoam™ Brand Cavitymate™ XPS product line (blue and grey)
- Our reduced GWP formulation Styrofoam™ Brand XPS (grey) for Canada
- Starting March 2021, we are introducing Styrofoam™ Brand ST-100 Series XPS (grey) in U.S. states that have enacted **HFC regulations**

1941

Styrofoam™ is invented, creating an entirely new product category (XPS)

1983

Styrofoam™ Brand Insulation begins a proud legacy of support with Habitat for Humanity

2009

Styrofoam™ Brand Insulation introduces zero ODP (ozone depletion potential) formulation

2011

BLUEDGE™ technology is introduced, providing a more sustainable flame-retardant solution for polystyrene foam

2016

Styrofoam™ Brand Insulation begins production with 100% renewable energy

2021

Styrofoam™ Brand XPS reduced GWP formulation launched in Canada

Introducing Styrofoam™ Brand ST-100 Series XPS low GWP formulation launched in HFC-regulated U.S. states
