

Kaushik Roy Choudhury
Senior Scientist and Project Leader
DuPont Photovoltaic and Advanced Materials

Kaushik currently leads DuPont's global PV field reliability program working on reliability and durability of PV packaging materials, degradation of polymeric materials in field-deployed PV modules, and PV system economics. At DuPont, he has previously led programs on metallization pastes for silicon photovoltaics, novel inorganic and hybrid thin-film solar absorbers, and light emitting and plasmonic nanomaterials.

Kaushik has a Ph.D. in Materials Physics and has over 15 years of experience in photovoltaic and optoelectronic materials.
