

Year of Validity: 2020

*Based on the evaluation made by our company, FilmTec dry elements are manufactured items and defined under OSHA as an "Article". The OSHA definition states that an "Article" is formed to a specific shape or design during manufacturing which has end use function dependent based off of the shape or design while it is being used, and during normal conditions of use does not release more than very small quantity, trace amounts of a hazardous chemical and does not pose a physical hazard or health risk to employees. "Articles" are not subject to the requirement for a material safety data sheet.*

*The Material Safety Data Sheets are only for the solutions used in the wet elements and modules that are needed for storage and shipment, pursuant to 29 CFR 1910.1200 (OSHA Hazard Communication Standard) modules, elements and as-sold components themselves are not hazardous chemicals.*

*We appreciate and value your business as we continue our commitment to provide high-quality products and service to our customers. If you have any questions or require further information, please contact us via our website at <http://dupont.com/water/contact-us>.*

No freedom from infringement of any patent or trademark owned by DuPont or others is to be inferred. Because use conditions and applicable laws may differ from one location to another and may change with time, Customer is responsible for determining whether products and the information in this document are appropriate for Customer's use and for ensuring that Customer's workplace and disposal practices are in compliance with applicable laws and other government enactments. The product shown in this literature may not be available for sale and/or available in all geographies where DuPont is represented. The claims made may not have been approved for use in all countries. DuPont assumes no obligation or liability for the information in this document.
